Paint and Not

Paint was so high the last few days the market was flooded with trash.

What is trash? It looks like paint and pretends to be paint, but isn't worth painting. It costs a painter's day's-work to put on a gallon of paint, good or bad; and a painter's day's-work is \$3 or \$4.

Add that to the price of a gallon. That is the cost of a gallon. Devoe is \$5 or \$6 a gallon; and trash a half-dollar less.

But Devoe is all paint and more too; you add oil to it; a gallon is 5 or 6 quarts of perfect paint for the painter's pot. But trash is three-quarters two-thirds or half paint; you pay a half dollar less for nobody knows-what-it-is.

10 gallons Devoe is enough for the average job; it takes 15 to 20 gallons of trash. And the wear same way. Unfortunately, they look alike when first put-on.

DEVOE
P. B. Speed sells it.
